

Vehicle Test Sensors – Vehicle Force Assembly [90418]

Be prepared to meet the anti-trap limits established with FMVSS and European resolutions 762/92 and 74/60/EEC using Sensor Developments Inc's new vent force system. This assembly uses our standard window anti-trap force sensor (10293) and allows it to be used for vent force measurements.

SPECIFICATIONS

Output (at 200N Max Load)	2mV/V nominal
• Non-linearity (%F.S.)	0.1
• Hysteresis (%F.S.)	0.1
• Overload Capacity	1,000N
• Compensated Temperature Range (°F)	70 to +170
• Usable Temperature Range (°F)	-65 to +250
